ABOUT ME

II'm a frontend developer from Ukraine, now settled in Germany, looking for a place to dive into new projects and expand my skills. I have a solid background in React, TypeScript, JavaScript, HTML, and CSS, and I've also been working Next.js and various libraries. I enjoy continuously building on my skills and learning something new, it keeps things interesting and challenging!

WORK EXPERIENCE

Trainee & Junior Frontend Developer

Web Studio Odesa / Odesa / Dec 2024 - Apr 2024

In these roles, I gained hands-on experience developing React components and working within the Next.js framework to deliver high-quality, responsive layouts tailored to customer needs. I also expanded my skills with tools like TypeScript, Node.js, Git, GitHub, and various JavaScript and React libraries. Additionally, collaborating with English-speaking team members enhanced my communication skills and adaptability in a multilingual environment.

EDUCATION

Master's Degree with horons

Odesa National University of Technology / Odesa / 2023

During my Master's degree program, I completed a wide range of courses in management, project organization, programming, cybersecurity, and even some 3D modeling.
My final project and practice in company allowed me to deepen my expertise in web development. I conducted my internship at a company where I worked on my thesis project. For this project, I improved my Bachelor's Degree App, used an enhanced tech stack, including Next.js and TypeScript. Also, I incorporated AI functionality to automate and optimize the learning process, making the application more effective and engaging. This project earned me my degree with honors.

Bachelor's Degree

Odesa National University of Technology / Odesa / 2022

During my Bachelor's program, I completed courses in computer science and fundamentals of computer networks, where I built a solid foundation in web development. I applied these skills in my final project, a quiz application that allowed teachers to create and host quizzes, manage time limits, and automatically calculate grades. This project gave me valuable hands-on experience in developing practical web solutions, reinforcing my passion for creating impactful applications.

SKILLS

ReactJS	NextJS 14	Javascript	TypeScript	CSS/HTML

Technical Agility	JavaScript/React libraries
